## **Objective**

Hard working and dependable software engineer looking to apply my skills in a developer position and to gain further experience in the industry.

## **Skills**

**Languages/Frameworks/Platforms:** JavaScript, Node.js, Java, Python, HTML, Pug (Jade), MySQL, CSS/LCSS/SCSS, PHP, Git, Semantic-UI, Bootstrap, AWS Lightsail

**Operating Systems:** macOS, Windows

**Applications:** Word, PowerPoint, Photoshop, Github

**Additional:** Determined, dedicated, fast learner, problem solver, and work-oriented

## **Education**

**Santa Clara University – Santa Clara, CA**

**2014 – 2018**

*Bachelor of Science in Computer Science*

*GPA: 3.4*

## **Work Experience**

**eBay Inc. – San Jose, CA**

**June 2018 – Present**

*Software Engineer*

- Work with small Agile scrum team on the view item page at ebay.com to rapidly develop new features, smash bugs, and roll out production-ready content.
- Communicate and plan with scrum team members to figure out best strategies and practices.

**Proofpoint – Sunnyvale, CA**

**March 2017 – August 2017**

*Software Engineer (Intern)*

- Developed multiple web applications for internal use. Applications would generally fetch data from databases and display it in a human readable manner.
- Maintained, updated, and restructured existing legacy code with git version control.
- Created helpful Python scripts for coworkers to use to automate certain tasks that had usually been done manually.

**SCU Media Services - Santa Clara, CA**

**September 2015 – June 2018**

*Student Employee*

- Correspond with customers to understand exactly what they need and to come up with solutions.
- Meet and work with coworkers in order to communicate the customer's needs.
- File technology requests, enter requests into a database, and handle customer transactions.
