Education

Santa Clara University – Santa Clara, CA   **2014 – 2018**
Bachelor of Science in Computer Science
GPA: 3.4

Work Experience

eBay Inc. – San Jose, CA   **June 2018 – Present**
Software Engineer
- Rapidly develop new features, smash bugs, and roll out production-ready code.
- Worked on the highly visible and visited View Item page, where millions of users visit to examine and buy millions of different items for sale.
- Collaborate and plan with scrum teams to figure out best strategies and practices.

Proofpoint – Sunnyvale, CA   **March 2017 – August 2017**
Software Engineer (Intern)
- Developed multiple web applications for internal use. Applications would generally fetch data from databases and display it in a human readable manner.
- Maintained, updated, and restructured existing legacy code with git version control.
- Created helpful Python scripts for coworkers to use to automate certain tasks that had usually been done manually.

SCU Media Services - Santa Clara, CA   **2015 – 2018**
Student Employee
- Correspond with customers to understand exactly what they need and to come up with solutions.
- Meet and work with coworkers in order to communicate the customer's needs.
- File technology requests, enter requests into a database, and handle customer transactions.
